

Site Auditor Pro

The First Dual-Mode Website Auditing Tool

Making the web accessible, one audit at a time.
Analyze light & dark modes simultaneously.

Production Ready • Live on Vercel

The Problem

With dark mode becoming standard (82% user preference), current auditing tools are leaving critical accessibility gaps.

Light Mode Only

Most tools completely ignore dark mode, missing 50% of potential accessibility violations and contrast issues.

 Leaves users in the dark

Vague Advice

Generic "improve contrast" warnings without specific hex codes or actionable solutions force developers to guess.

 Wastes developer time

Blind Implementation

No way to preview fixes before committing code. Developers have to implement, deploy, and re-audit in a slow loop.

 Slow iteration cycles

Our Solution

The first comprehensive auditing tool designed for the modern web ecosystem.

Dual-Mode Analysis

Analyzes both light and dark modes simultaneously to catch issues other tools miss.

Unique Feature

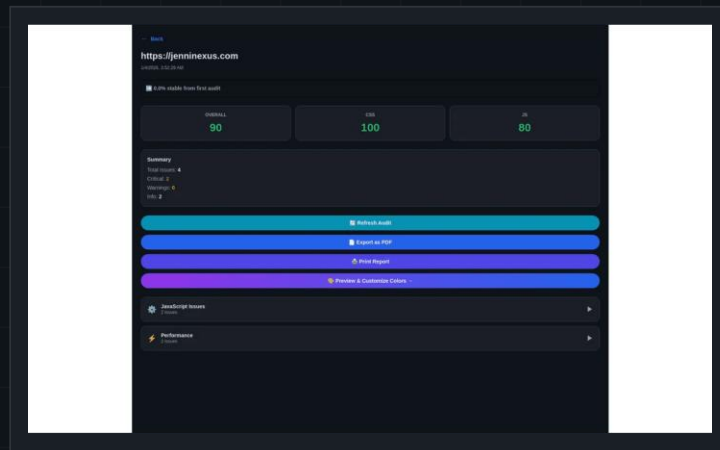

Specific Color Fixes

Provides 3 specific WCAG-compliant color alternatives with exact hex codes.

Live Preview

Test fixes in real-time with a live website preview before committing any code.

Competitive Advantages

Why Site Auditor Pro is superior to existing free tools.

Dual-Mode Analysis

Others

Only check light mode. Miss 50% of issues.

Site Auditor Pro

Analyzes Light + Dark modes simultaneously.

2x

More Issues Caught

Live Preview

Others

Static reports. Implement fixes blind.

Site Auditor Pro

Real-time preview & variable editing.

-5h

Saved Per Project

Framework Aware

Others

Generic parsing. Breaks on modern stacks.

Site Auditor Pro

Native Bootstrap & Tailwind support.

100%

Modern Stack Ready

Target Market

Empowering the creators of the modern web ecosystem.

Web Developers

Fix accessibility issues before they become problems.

Designers

Test color schemes for WCAG compliance early.

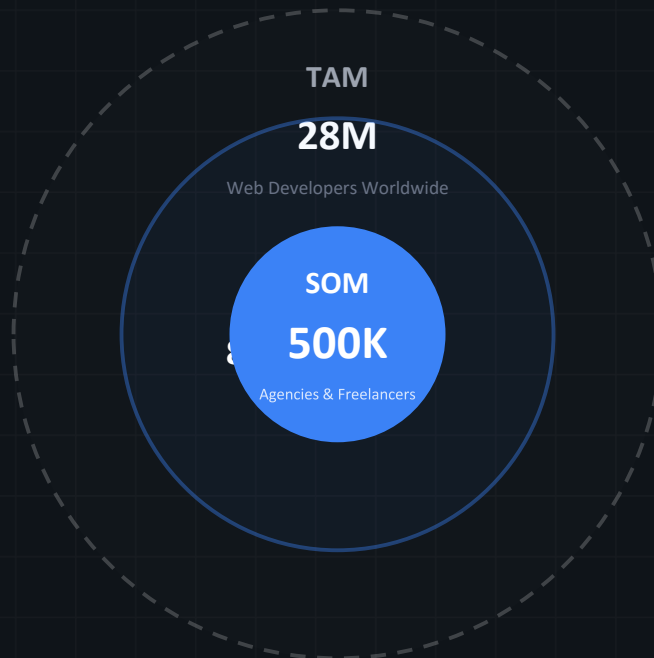

Agencies

Audit client sites and provide professional reports.

Product Teams

Ensure consistent quality across web properties.

Business Model

Transitioning from community growth to a sustainable SaaS revenue model.

Current			
			
Free	Pro	Team	API / Ent
\$0	\$19 /mo	\$49 /mo	Custom
✓ Basic Audits ✓ HTML Exports ✓ Community Support ✓ Limited History	✓ Unlimited Audits ✓ All Export Formats ✓ Priority Support ✓ API Access (Basic)	✓ 5 User Seats ✓ Shared Reports ✓ White-labeling ✓ Team Management	✓ High-volume API ✓ CI/CD Integration ✓ SSO & Security ✓ SLA Guarantee

Business Value

Delivering measurable ROI across the entire web development lifecycle.

Freelancers & Agencies

Clients expect WCAG compliance, but manual auditing is slow. Automate the process and generate professional reports instantly.

Impact

Save 5-10 Hours / Project

Product Teams

Accessibility issues found late are expensive. Audit staging sites before launch to catch issues early.

Impact

80% Reduction in Post-Launch Fixes

Designers

Test color palettes against WCAG standards in both light and dark modes before handing off to developers.

Impact

Eliminate Back-and-Forth

Developers

Stop guessing with vague advice. Get exact hex codes and copy-paste CSS fixes.

Impact

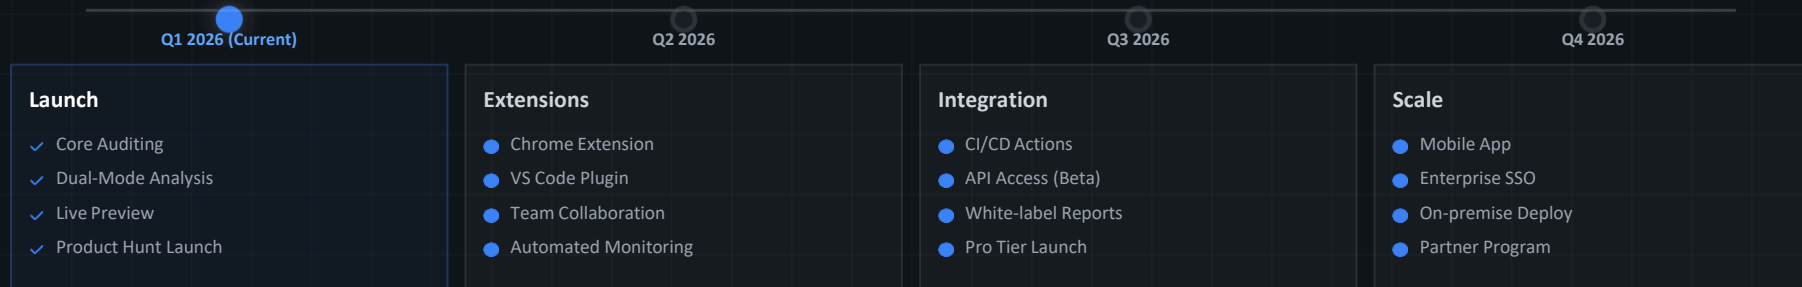

Fix in Minutes vs Hours

Traction & Roadmap

From launch to enterprise scale in 12 months.

Product Roadmap

Why Now?

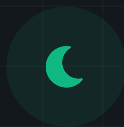

Market forces are converging to create immediate demand for better accessibility tools.

+300%

ADA Lawsuits

Accessibility litigation has tripled since 2018. Compliance is no longer optional.

82%

Dark Mode

Users prefer dark mode, but most sites are only tested for light mode accessibility.

Dominant

Frameworks

Bootstrap & Tailwind rule the web. Tools must understand these modern stacks.

67%

Need Tools

Developers cite lack of proper tooling as the #1 barrier to accessibility.

The Ask

Join us in building the standard for accessible web development.

Immediate Focus

User Feedback

Beta testing with agencies and freelance developers to refine the workflow.

Community Growth

Engagement on GitHub and Product Hunt to build initial traction.

Partnerships

Integrations with existing dev tools and accessibility platforms.

Future Growth (6-12 Mo)

Seed Funding

\$250K - \$500K

To accelerate product development and go-to-market.

Key Hires

Marketing Lead and Accessibility Expert to drive adoption.

Strategic Partners

Enterprise pilot programs with large product teams.
